# FORTITUDE BAMBOO NATURE

**Fortitude** refers to strength in the face of adversity or difficulty. This word comes from the Latin word *fortitudo*, meaning "strength."

People who have fortitude are described in an admiring way for their courage.

This, we believe is one of the core characteristics of every cancer patient.

We are Primarily using the element 'Bamboo' to depict fortitude. Bamboo has greater tensile strength than steel, and it withstands compression better than concrete!!!

WOOD ( BAMBOO )

EARTH

**Nature** is the Paradigm of strength in the times of difficulty. It stands strong during times of hardships & emerges stronger. We are hence considering the 5 Basic Elements of the Universe to depict Fortitude of Nature with Bamboo as the core element..

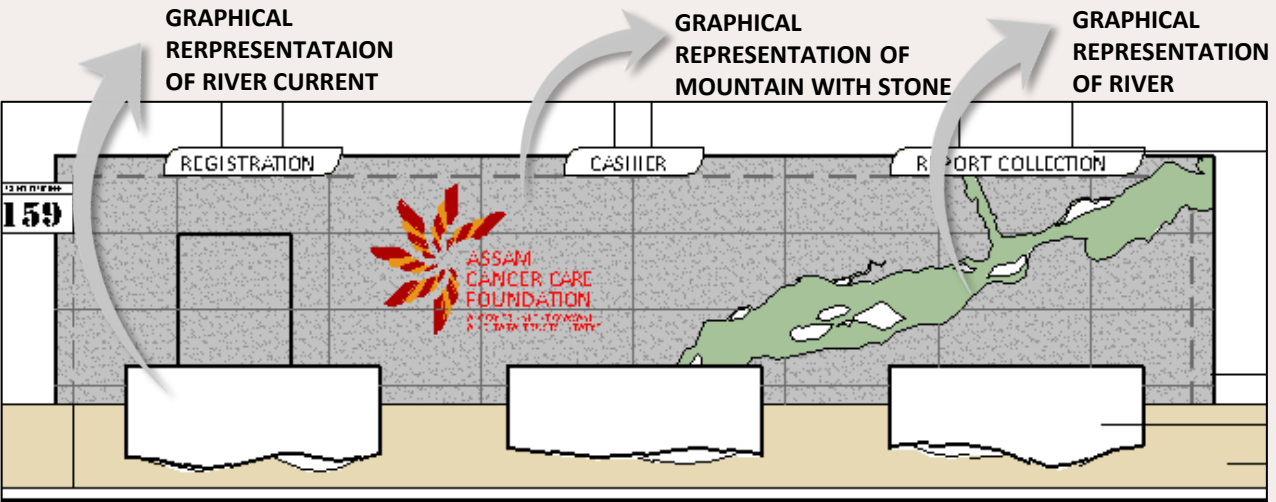

We have depicted different **Elements of Nature** through use of Stone in the Reception Backdrop, Paint Graphic in spaces, Bamboo furniture, Bamboo and metal murals.

Tea Estate plans represented as art in the form of Fingerprints – bringing a sense of touch. The Moss Outline in the reception backdrop showcasing Bramhaputra The river currents on reception tables & help desks, etc

ARTWORK

Graphical  
Representation Of  
Bamboo as  
Painted Accents

ARTWORK

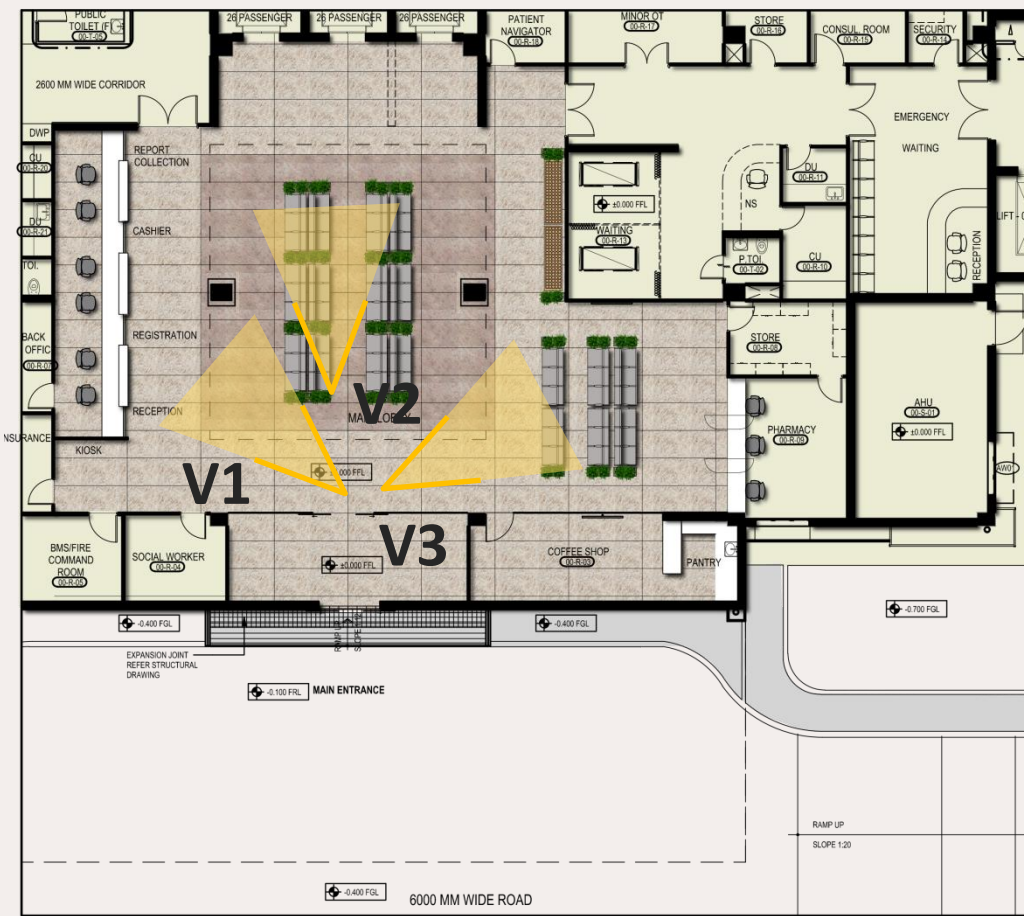

Natural Textures like Stone Wood Fauna resonate with our concept.

Vitrified tile and granite shades corresponding to the colour palette are used for the flooring with accents.

Graphic representation of bamboo are seen in wall painted murals, special waiting seating etc

Two focal points are created- one using the flooring pattern and false ceiling with wooden tone with seating , and the second – a grand reception, both depicting a sense of direction as you enter the lobby.

The arrangement of 48 seats is partly centralized creating maximum circulation space all around and partly tucked into the pharmacy area for an effective circulation.
