SECTION I

1. Introduction

1.1 About Tender Inviting Entity

- 1.1.1 Tata Trusts have signed an MoU with Government of Assam ("GoA") to optimally plan, design and implement a distributed hierarchy of cancer care facilities. The distributed care model was conceptualized by the Trusts and the Government of Assam to create patient-centric cancer institutions to deliver standardized and affordable care closer to patients' homes (hereinafter referred to as "Program"). The Program is expected to benefit 50% of cancer patients in Assam by 2021. Currently, one apex hospital handles a cancer patient's journey end-to-end. Smaller centers in different regions, interlinked with the apex centers, are proposed to be set up to handle diagnosis and care, and to shift load away from apex hospitals. This will bring high-quality cancer care closer home for patients and reduce their financial burden. Infrastructure development is being supplemented with plans to develop trained human resources, awareness and prevention programs, and a unified technology platform to deliver high-quality care.
